Log Files Group 7

January 15, 2024

Meeting Minutes: 30 Minutes

Meeting Overview:

The team brainstormed numerous project ideas such as restaurant management system, online banking system, auction bidding, hospital software, and etc. This resulted in 10 total ideas.

January 17, 2024

Meeting Minutes: 60 Minutes

Meeting Overview:

The team discussed all project ideas and voted on 3 main ideas, restaurant management system, gardening and plant care tracker, and fitness and calorie tracker. Due to the group's mixed thoughts on the project idea, a written summary of each idea was sent to the professor by email. Based on the reply, the team will propose their final project idea accordingly.

January 22, 2024

Meeting Minutes: 30 Minutes

Meeting Overview:

In response to the email, the team finalized their project idea and chose to pursue the restaurant management system. The team then discussed possible unique features which can be implemented such as automatic table assignment and tip projection. We decided on having a restaurant management system, automated table allocations, feedback and rating system, and tip projection.

January 24, 2024

Meeting Minutes: 60 Minutes

Meeting Overview:

Discussion about interview preparations took place in this meeting. This includes any interview questions and any data collection which is required. The GitHub repository was also set up and Eclipse was decided upon for the IDE for the project. Upon setting up all system

January 25, 2024

Meeting Minutes: 30 Minutes

Meeting Overview:

During this 30 minute interview, the customer was introduced as a waitress. The description of the restaurant was also given. In this interview, the team prompted questions on the efficiency and workstyle of the environment. The customer responded that the workspace is stressful and needed an easier way to manage customers, reservations, and tables. With this in mind, we had our first big story to implement.

February 5, 2024

Meeting Minutes: 20 Minutes

Meeting Overview:

Broke down the first story into 5 distinct parts that need to be implemented for the project. This includes Customer and Business sign in, customer reservations, business view and manage reservations, table management, and menu. Pouya was tasked with customer and business sign in, Farah fetching customer reservations, Andrew business view and managing reservations, Ricky table management, and Meem with adding a menu.

February 12, 2024

Meeting Minutes: 30 Minutes

Meeting Overview:

With the upcoming delivery 1 due date we have implemented all the major features but have realized that we need to also implement JUnit testing and complete some documentation. In which we assigned the vision statement to Meem, Wiki/Readme to Farah and Ricky, and Log Files to Andrew. In this time, the team agreed that Pouya would continue to analyze the code for any flaws.
